### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin G. Shao (Reg. 45,095) on 4/13/2006.

The application has been amended as follows:

#### **IN THE CLAIMS:**

Claim 27, line 1: "machine-readable", has been replaced with --computer-readable--.

#### ***Allowable Subject Matter***

2. Claims 1 – 27 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a method for establishing secured roaming among a wireless station, a first and a second access points using wireless session keys in a wireless network.

Applicant's independent claim 1 recites, *inter alia*, a method for establishing secured roaming with a structure as defined in the specification (pages 9 – 17) including a first access point requesting a first ticket including a first session key from an authentication server at a first time and using the first ticket to establish a first secured

Art Unit: 2617

session with the first session key between the first access point and the wireless station; and in response to a second ticket request from the wireless station through the first secured session when the wireless station attempts to communicate with the second access point at a second time after the first time, the first access point forwarding the second ticket request to the authentication server and relaying through the first secured session a resulting second ticket including a second session key with a predefined lifetime starting from after the second time, from the authentication server to the wireless station, the second ticket being different than the first ticket, the second key being different than the first key, wherein the second ticket is used to establish a second secured session with the second session key between the wireless station and the second access point. Applicant's independent claim 1 comprises a particular combination of element, which is neither taught nor suggested by the prior art.

Accordingly, applicant's claims are allowed for these reasons and for the reasons recited by applicant in amendment filed 3/27/2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
